

SE - Overview of IT Industry

Session 4: Software Development Lifecycle (SDLC) Explain SDLC phases: Requirement Design Development Testing Deployment Maintenance. Discuss Agile vs Waterfall, Scrum roles (PO, Scrum Master, Dev Team). Relate each phase to a real-world app (e.g., "Spotify new feature rollout"). Trainer Demo: Show a Jira board mock-up with stories in "To Do / In Progress / Done."

Task :

Question :- 1

List all 6 phases of SDLC in order with one line about each.

Ans :-

Phase	Description
Requirement Gathering	Collect and understand customer requirements.
Analysis	Analyze requirements and plan the project.
Design	Create the software structure and design.
Development	Write the code and build the application.
Testing	Check the software for bugs and errors.
Maintenance	Fix issues and update the software after release.

Question :- 2

Write 3 differences between Agile and Waterfall models.

Ans :-

Agile	Waterfall
Work is done in small iterations (sprints).	Work is completed phase by phase.
Changes can be made easily during development.	Changes are difficult after a phase is completed.
Customer feedback is taken regularly.	Customer feedback usually comes at the end.

Question :- 3

Name the 3 main Scrum roles and write one line about the responsibility of each.

Ans :-

Role	Responsibility
Product Owner (PO)	Defines requirements and prioritizes work.
Scrum Master	Helps the team follow Scrum practices and removes obstacles.
Development Team	Designs, develops, and tests the product.

Question :- 4

What is a Sprint in Scrum? Mention its typical duration.

Ans :-

A **Sprint** is a fixed period during which the Scrum team completes a set of tasks or features.

Typical Duration: 1 to 4 weeks (commonly 2 weeks).

Question :- 5

What do these Jira board columns mean: To Do, In Progress, Done, Backlog?

Ans :-

Column	Meaning
Backlog	List of tasks that need to be done in the future.
To Do	Tasks selected and ready to start.
In Progress	Tasks currently being worked on.
Done	Tasks completed successfully.
